He (preparing to leave)—I assure you, Miss Sweet, the time has passed very pleasantly this evening.  
She (abstractedly)—Yes, it is pleasant to know that it is past.—Truth.

**The World's Supply of Wheat.**  
An English expert prophesies a universal dearth in the wheat supply. He claims that the wheat producing soil is unequal to the strain that will be put upon it. Even now when the food supply of the world is ample, thousands die because their disordered stomachs fail to properly assimilate the food they take. Hostetter's Stomach Bitters strengthen and tone up the stomach and digestive organs, and enable them to perform their proper function. This great remedy cures dyspepsia, bilious liver, nervousness and fever and ague.

The ordinary cigar in Porto Rico can be bought three for a cent.

## Good Digestion

Waits on appetite, or it should do so, but this can be only when the stomach is in a healthy condition. Hood's Sarsaparilla so tones and strengthens the stomach that it digests food easily and naturally and then all dyspeptic troubles vanish.

### Celestial.

"I lived in China a long time," said S. B. Denman of Boston, at the Wellington, "and got a pretty fair mastery of the language. The number of white men who can speak Chinese is exceedingly small, and so when I listened to a gentleman and his wife on a Broadway car the other day conversing in that tongue I was at first considerably puzzled. Finally I made up my mind that they must have been engaged in missionary work among the celestials. Then I addressed myself to the gentleman, speaking in Chinese, whereat he was visibly astonished and so was the lady. Then mutual explanations followed and I found I had been correct in my conjecture. The pair had been living for twenty-one years in China trying to convert the heathen, and had grown so accustomed to using the speech of the country that it came to them more readily than English."—Washington Post.

### "Honor" Widely Distributed.

More than 50,000 Frenchmen belong to the Legion of Honor. Thirty-two thousand of these are connected with the army. The rest are civilians.

### PERIODS OF PAIN.

Menstruation, the balance wheel of woman's life, is also the bane of existence to many because it means a time of great suffering.

While no woman is entirely free from periodical pain, it does not seem to have been nature's plan that women otherwise healthy should suffer so severely. Lydia E. Pinkham's Vegetable Compound is the most thorough female regulator known to medical science. It relieves the condition that produces so much discomfort and robs menstruation of its terrors. Here is proof:

DEAR MRS. PINKHAM—How can I thank you enough for what you have done for me? When I wrote to you I was suffering untold pain at time of menstruation; was nervous, had headache all the time, no appetite, that tired feeling, and did not care for anything. I have taken three bottles of Lydia E. Pinkham's Vegetable Compound, one of Blood Purifier, two boxes of Liver Pills, and to-day I am a well person. I would like to have those who suffer know that I am one of the many who have been cured of female complaints by your wonderful medicine and advice.

—Miss JENNIE R. MILES, Leon, Wis.  
If you are suffering in this way, write as Miss Miles did to Mrs. Pinkham at Lynn, Mass., for the advice which she offers free of charge to all women.

## WORE CONFEDERATE BADGE

VETERANS AT MACON RECEIVE  
PRESIDENT WARMLY.

ITINERARY BROUGHT TO A CLOSE

McKinley Declares That Every Moment  
of His Visit South Has Been  
Greatly Enjoyed.

President McKinley left the state of Georgia Monday night after one of the pleasantest trips of his life. His southern tour, which was given such magnificent inaugural at Atlanta, was not only uniformly pleasant, but uniformly successful, and, as he said: "I have enjoyed every minute of my time in the south."

The chief executive returns to Washington confident that his trip will result in a more thorough, indeed, a perfect understanding between the north and south; that the north has a better understanding of the race problem ever present in the south, and that the people of the south had a better realization of the fact that all sectional lines have been eliminated; and he feels that having contributed to this end, he, the president, has good cause for self congratulation.

In his remarks at Augusta he bade an adieu to the south in general, referred in touching terms to the pleasure of his visit to this section, and how he would ever cherish the memories of it.

The early part of the day Monday was devoted to Macon, and the closing hours to Augusta. At both places the entertainment was pleasant and interesting. Naturally, the military played the most important part at each city.

The most interesting feature of the Macon visit was the reception given the president by the Bibb County Confederate Veterans' association and the testimonial they presented him. The president carried back with him as the most interesting memento of his trip that parchment bearing his own golden words about the confederate graves with the indorsement of these southern soldiers written on it. At Macon the president wore while speaking a Confederate veteran's badge which an old soldier of the Confederacy had pinned on his coat.

At Augusta the veterans made a decidedly unique display, being ranged in front of the speaker's stand with their battle-worn Confederate flags and dressed in their old uniforms of gray. The reception at the Commercial Club was a very delightful affair, and everybody was pleased with the splendid showing of the troops at Camp McKenzie.

### BIG BLAZE IN TERRE HAUTE.

Business Houses Burned Entailing a Loss of Nearly \$2,000,000.

The most disastrous fire in the history of Terre Haute, Ind., took place Monday night, causing a loss of nearly \$2,000,000. The blaze started in the big show windows of the Havens & Geddes company, wholesale and retail dealers in dry goods and notions. It is supposed that a live electric wire set fire to the cotton with which the window was decorated.

The following firms are the losers: Havens & Geddes, \$500,000; Breinig & Miller, furniture, \$25,000; Pixley & Co., \$100,000; Terre Haute Shoe Company, wholesale, \$150,000; Albrecht & Co., retail dry goods, \$750,000; United States Banking Company, \$80,000; Thorman & Schloss, clothiers, \$50,000. The Havens & Geddes loss is \$400,000 on stock and \$100,000 on building; insurance about two-thirds.

### BRICE'S BODY IN STATE.

Remains of Dead Millionaire Viewed by Many Thousands.

Lima, Ohio, was draped in mourning and business was suspended Monday while the remains of the late Calvin S. Brice remained in state. When the funeral train arrived Sunday the remains were escorted by the G. A. R. posts, the Union Veterans, the Elks and others to the old Brice homestead. At 9 o'clock Monday the same solemn procession acted as escort and the remains were conveyed to the First Presbyterian church, where they were viewed by thousands, while old comrades did sentinel duty.

### HULL FAVORS PLAN.

Military Committee Will Approve Federal Care of Confederate Graves.

A Washington dispatch says: Whenever the proposition comes before the house for the government to assume the care of the graves of the Confederate dead the military committee of that body will recommend that the Confederate cemeteries be established Federal grounds, which would be necessary before an appropriation could be made for them. Representative Hull, of Iowa, the chairman of the committee on military affairs, favors putting into operation the suggestion offered along this line by the president.

### NEW TENNESSEE RAILWAY.

The Humboldt, Dyersburg and Tiptonville Chartered.

A Nashville dispatch says: The secretary of state has granted a charter to the Humboldt, Dyersburg and Tiptonville Railroad company, with an authorized capital stock of \$1,500,000. The plan is to build a railroad from Humboldt, in Gibson county, to Dyersburg, in Dyer county, and on to Tiptonville, in Lake county.

## Does Your Head Ache?

Are your nerves weak? Can't you sleep well? Pain in your back? Lack energy? Appetite poor? Digestion bad? Boils or pimples? These are sure signs of poisoning.

From what poisons? From poisons that are always found in constipated bowels.

If the contents of the bowels are not removed from the body each day, as nature intended, these poisonous substances are sure to be absorbed into the blood, always causing suffering and frequently causing severe disease. There is a common sense cure.

## AYER'S PILLS

They daily insure an easy and natural movement of the bowels.

You will find that the use of **Ayer's Sarsaparilla**

with the pills will hasten recovery. It cleanses the blood from all impurities and is a great tonic to the nerves.

### The Maine's Orders for Havana.

Captain Charles D. Sigbee has contributed to the Century the first portion of his "Personal Narrative of the Maine." Captain Sigbee says: "Admiral Sigsbee announced that he had received instructions from the Navy Department to send the Maine to Havana. I do not know personally the precise reason which induced the United States government to act at that particular time. My orders were to proceed to Havana and make a friendly visit. I was left to act according to my own judgment, in the usual way; that is to say, I was undoubtedly assumed that I would know how to act on my arrival in Havana, and it was intended to hold me responsible for my action. The situation seemed to call for nothing more than a strictly careful adherence to the well-known forms of naval procedure and courtesy. It was to be expected that the Spanish people in Havana would prefer that the Maine should stay away; but with a lingering insurrection, the end of which was not in sight, with American interests in Cuba affected adversely, and American citizens in Cuba alarmed for their safety, the United States had decided to show its flag from a public vessel in Cuban waters. It is quite certain that I gave myself no concern over the peculiarities of the situation. My vessel was selected to go to Havana, and I was gratified at the choice, just as any other commanding officer would have been. I volunteered the remark to Admiral Sigsbee that I should try to make no mistakes.

### Lung Gymnastics.

Direct gymnastics for the lungs, to increase their capacity and elasticity, are almost a safeguard against consumption, if taken in time.

Dr. Otis, in the Therapeutic Gazette, advises people with weak lungs to stand erect in a well ventilated room, place the hands on the hips and take long, deep, slow breaths, varying the rhythm, and at times taking short, jerky breaths for variety. The breath should be drawn only through the nose.

Better yet, combine the breathing exercises with the setting up drill or other arm exercises. Dr. Otis gives these exercises, to which others might be added:

1. Slowly raise the arms from the sides until they meet above the head, breathing deeply. Breathe out while slowly lowering.
2. Raise the arms in front; carry them as far back as possible; then down. Breathe as before.
3. Slowly rise upon the toes, breathing deeply.
4. Extend the arms in front; carry one leg back as far as possible.
5. Lie on the back; raise the arms backward and over the head, while breathing deeply.

People with plenty of lung capacity can stand even bad air without suffering. It is well known that women, whose lung capacity is interfered with by corsets, are much more apt to faint in close, ill ventilated rooms than men.

### THE ROSES WERE DRUGGED.

How Travellers on German Railway Train Were Robbed by a Clever Scheme.

It may be all right for heroines to make their adorners tremulously happy by presenting them with roses. The novelists and dramatists must not be robbed of all their stock in trade. But it behooves the nineteenth century man to be particular about the girl who gives them. A short time ago a man and his two sisters were alone in a compartment on a German railway. At a station, an elegantly dressed, thickly veiled woman entered the carriage, carrying a superb bouquet of roses. When the train started, she asked her fellow travellers if they would object to her closing the window. The man hastened to close it for her, and in moving to get out of his way, the stranger dropped her roses. He picked them up for her; and, thanking him charmingly, she asked him to keep one. Then, turning to his companions, she graciously offered each of them a few of the flowers. Naturally the courtesy was accepted; and the next thing of which the travellers were conscious was that the train had arrived in Berlin, that their veiled companion had disappeared, and that all of their money and valuables had gone with her. Of course, the roses had been drugged.

The police have discovered that the criminal is a young man, and that he has conducted a number of daring robberies in a similar fashion. One must admit that it is the refinement of robbery, and if one must be robbed at all, the rose method is preferable to sandbagging or garroting. If Chicago citizens should meet young women who would insist upon showering roses upon them, they would doubtless welcome the change from cruder forms of hold-up. But, after all, one may as well fight shy of veiled women with roses.

### Insects and Disease.

Nothing could more strikingly illustrate the importance of small things than the large role which is now attributed to the mosquito in the etiology of some of the most serious and widespread diseases to which the human race is subject. It is truly said that what prevents the successful colonization of many tropical countries, and what throws the great obstacle in the way of civilization and good government in the vast regions of Central Africa, is not climate, not distance from home, and not unfriendliness on the part of the natives. The obstacle is malaria, and now we find that the prevalence of malaria, so far as man is concerned, depends on the mosquito, and that this pestilent little insect, in addition to irritating and annoying is the means by which the poison of malaria is propagated and distributed. For years past botanists have known the important part played by birds in the scattering of seed, and of insects in the distribution of the pollen of plants, and it seems not unlikely that pathologists will have to recognize in a much larger degree than has till lately been done the large part taken by the subordinate forms of life by which we are surrounded—our cattle, our horses, our dogs and cats, our flies, our mosquitoes, and perhaps even our fleas—in distributing disease from man to man, and, as is stated in regard to our mosquito and malaria, in deciding whether the extension of our empire over great areas of the globe's surface shall be possible or not.—Hospital.

### The Country's Biggest Auditorium.

The largest auditorium in the country is to be opened in Kansas City by Sousa's Band and a ball on Washington's birthday. The building is being erected by a stock company, and is called Convention Hall. The outside dimensions are 198 by 314 feet, giving an arena floor of 60,000 square feet, an amphitheatre floor of 31,000 square feet, besides a second gallery and a roof garden, bringing the total floor space up to 153,100 square feet. The standing capacity is 78,500 people, and the total seating capacity 20,000. In the arena there is a room for six circus rings. The cost, \$100,000, is considered very small for so large a building of stone and cream brick.

## GERSTLE'S FEMALE PANACEA.

TRADE (G. F. P.) MARK.

My wife was taken sick and I at once called on family physician, and he thought best to call in another physician for consultation. After using their medicine for two months I found she was very little better, so I then purchased a bottle of Gerstle's Female Panacea and commenced treating her. Before she had finished taking the second bottle she was in better health than she had been in years previous. I then recommended the Panacea to three of my neighbors with good results.
